

Cybercrime - Prevent and Protect

Sean O'Neil, Danny Howett, Bedfordshire Police

Wednesday, 23th November 2016

7.00-8.00pm

(Registration starts at 6:30pm)

Pilgrim Suite

**The Park Inn Hotel, 2 St Mary's Street,
Bedford MK42 0AR**

(Free Parking at the rear – Inform Hotel Reception)

Bedfordshire Police's innovative Cyber Hub was launched in 2015 as a new unit dedicated to analysing digital data to investigate cyber crime. Lots of other forces have cyber crime units, but Bedfordshire's is a ground-breaking comprehensive 'Hub' which combines teams specialising in Digital Forensics, Cyber Crime Investigation and Internet Child Abuse Investigation Team (ICAIT). The highly trained investigators use the very latest technological advances to track down cyber criminals – tracing the footprint left by their online activity. The teams also provide investigative support to other criminal cases across the force.

Sean O'Neil, the Cyber Security Advisor, is to share about how persons and business can prevent from falling victims.

Danny Howett, Cyber Investigator is to share about the ways Bedfordshire Police Cyber Hub protects us against cybercrime.

Agenda

6.30pm	Registration, refreshments and networking
7.00pm	Talk – Sean O'Neil, Danny Howett
7.40pm	Questions and Answers
8.00pm	Networking

Speakers:

Sean O'Neil L.Lb (Hon) MSyl, has extensive law enforcement experience having served for 30 years in UK Police service. He was a fully qualified 'Senior Investigating Officer' (SIO), with vast experience in dealing with 'Critical incidents' and 'Crisis Management' affecting organisational reputation. He is now tasked to provide cyber security advice to business; to help prevent cybercrime attacks and bring companies together to learn and tackle cyber enabled crime.
